Dear Sir or Madam,

The purpose of this is letter is to write about my experience with the ModiW Soft website design company:

Earlier this year, we decided to establish a tourism company that would provide a bridge between Mongolia and Middle East. One of the key assets of this firm is its website, which has to be in three languages with different contents, since our services in Mongolia for Arabs are, naturally, different from those being offered for Mongolians in Dubai. For this reason, we have to gear our specific offers to the particular audience and flexibility in approach is paramount.

I have contacted many website developers and then carefully considered their offers. Among the best was ModiW Soft. This was certainly not the cheapest, but with my experience in this field, I could see that they have experienced communication tools and strategies, which set them apart from their competitors and led to me select them and conclude the contract with them. Even though, I could have brought in an international web designer, I decided to choose a Mongolian firm, which is, of course rational, because I am targeting Mongolians.

After signing the contract, they designed us a professional logo and clear visual identity; they later surpassed my expectations by working with great discipline to meet the time table we had agreed on during the negotiation step.

Even after making the transfer they are undertaking web maintenance immediately as required.

Therefore, I wholeheartedly recommend ModiW Soft as the best choice to develop your online business in Mongolia.

Ameen Alkutainy
